

Music and the Brain for Musicians:
Understanding the Research and Getting Involved
by Laura Stambaugh, Ph.D.

Table of Contents

Part I: A Musicians' Guide to Perception and Cognition

Chapter 1 Introduction: Warm-Up

- Cross-talk
- Now is the Time
- Overcoming Disconnections
- How Do I Use this Book?
- What are Perception and Cognition?
- Stream Segregation/Auditory Stream Analysis
- Limitations
- Reflection and Application
- Coda
- References

Chapter 2 The Earliest Music Perception: Infants and Music

- Techniques for Research with Infants
- Perceptual Reorganization
- Pitch
- Timing
- Timbre
- Infant-Directed Song and Speech
- Coda
- Reflection and Application
- References

Chapter 3 Pitch Perception

- Just Noticeable Difference
- Theories and Models of Tonality
- Tonality and the Influence of Culture
 - Probe-Tone Task
- Duration
- Timbre
- Vibrato
- Loudness
- Absolute Pitch
- Congenital Amusia
- Coda
- Reflection and Application
- References

Chapter 4 Pitch Production

- Sung Pitch
 - Development of Singing Skills
 - Expert Singers
- Played Pitch
 - Wind Instruments
 - Orchestral String Instruments
- Speakers of Tonal Languages
- Cultural Influences
- Coda
- Reflection and Application
- References

Chapter 5 Timing

- Crosstalk
- Models of Timing
- Timing Perception
 - Duration
 - Beat
 - Tempo
 - Meter
 - Rhythm
 - Entrainment
 - Groove
 - Cultural Influences
- Timing Production
 - Duration
 - Beat
 - Tempo
 - Rhythm
 - Meter
 - Entrainment and Synchronization
 - Expressive Timing
 - Timing in Computer and Electroacoustic Music
- Coda
- Reflection and Application
- References

Chapter 6 Emotion

- Theoretical Perspectives of Music and Emotion
- Conducting Research on Music and Emotion
- Emotional Experiences of Musicians
- Performance Anxiety is an Emotional Experience
- Coda
- Reflection and Application
- References

Chapter 7 Music and Language

Modularity or the Resource Sharing Framework?
Speech-to-Song Illusion
Speakers of Tonal Languages
Second Language Abilities
Cocktail Party Phenomenon/Speech-in-Noise
Coda
Reflection and Application
References

Chapter 8 Memory

Overview of Memory
Sensory Memory
Short-Term and Working Memory
Consolidation and Long-Term Memory
Memory in Musical Contexts
 Tonal Memory
 Memorizing Music: Performance Cues
Coda
Reflection and Application
References

Chapter 9 Performance as a Unique Form of Motor Learning

Motor Learning Theories
Massed vs. Distributed Practice
Focus of Attention
Cognitive Load and Contextual Interference
Varied Practice
Feedback
Use of Models
Coda
Reflection and Application
References

Chapter 10 Social Psychology of Music

Social Uses and Functions of Music for Young Adults and Senior Citizens
Performance Settings
Performers and Audiences
Synchronization in Performance
Gendered Experiences
Social Justice
Coda
Reflection and Application
References

Chapter 11 Extra-Musical Benefits of Music Study

I.Q. and “Smarter”
Executive Functions
Speech-in-Noise
Reading Skills
Coda
Reflection and Application
References

Chapter 12 Music and Health

Dementia
Depression
Parkinson’s Disease
Focal Dystonia (Musician’s Cramp)
Use of Music as Torture
Coda
Reflection and Application
References

Part II: A Musician’s Guide to Neuroscience

Chapter 13 Brain Structure

Central Nervous System
Peripheral Nervous System
The Spine is for More than Posture
The Really Small Bits: Neurons and Glial Cells
Brain Function
 Communication between the Small Bits: Synapses
 Neural Oscillations
 Networks, Pathways, and Systems
Coda
Reflection and Application
References

Chapter 14 Tools and Techniques for Measuring Brain Structure and Function

Getting Oriented to Images
Structural Tools for Measuring the Brain
Functional Techniques for Measuring Brain Activity
Coda
Reflection and Application
References

Chapter 15 The Neuroscience of Music

What do we Know About how the Brain Processes...

Beat, Rhythm, and Meter

Pitch and Melody

Tonality

Timbre

Familiar vs. Unfamiliar Music

Musical Imagery

Improvising

Composing and Conducting

Emotion

How Does Music Study Change the Brain?

Audio-Motor Network

Cultural Differences

Myelination and Pruning

Corpus Callosum

Coda

Reflection and Application

References

Part III: Becoming a Music Performance Scientist

Chapter 16 “How to” a Collaborative Study

From a Performance Question to a Research Question

About Research Methods

First Contact: How do You Find a Collaborator?

The Parts of a Human Subjects Research Study

Designing a Study

Data Collection

Data Preparation and Analysis

Interpreting Results

Presenting the Research

Preparing the Article

Summarized Workflow: Who Does What?

Model of a Collaborative Study

Coda
